

ABSTRACT OF PHARMACY MANAGEMENT SYSTEM

Pharmacy management system is a medicine booking site which help users with ease of booking medicine at their convenience. Our main aim is to deliver medicine at all the places , making customer feel ease.

All the patients who consults the doctors of the Hindalco Hospital can get their prescribed medicine from this site easily , avoiding the need to travel in this covid situation. This site can be used by both - already registered users of Hindalco Hospital as well as it can be also used by other user who gets prescribed medicine from other hospitals. It consists of the following module:

The Admin controls the overall functions of this site. He/she can add or remove doctors of Hindalco Hospital , manage medicine stock of that respective pharmacy , accept or reject user's booking request, manages medicine delivery process, verifies the medicine prescription.

The Doctor module can be used to pass medicine prescription, manages patient prescriptions, manages registration.

The patient module can be used to book your prescribed medicine at ease. If the user is already a registered user of Hindalco Hospital then directly they can book their medicine from pharmacy , otherwise they need to be get accepted by the Admin , verifies the prescription and then only that user can place order for required medicine.

The Pharmacy module is added from Admin module to proceed with user's medicine booking confirmation process, then they can proceed with the billing and shipping process to the respective location.
